so that you don't have to be

Recognized as the industry leader, we now partner with  
Inspection Firms to supplement the expansion joints portion  
of your assessment as required by law or Owner request

**Your Strongest Partner for  
Expansion Joint Systems**

A brand of  
**MBCC** GROUP

# Expansion Joint Inspection Services

Recognized as your Strongest Partner for expansion joint systems, Watson Bowman Acme has over 70 years experience in the design, testing, supply, installation oversight, and maintenance for your expansion joint systems.

We now proudly offer our customers Expansion Joint Inspection services as a supplement to their overall inspections and assessments in parking structures.

Through the use of sophisticated non-destructive testing equipment, our experienced Inspectors provide a holistic picture of the expansion joint condition not only on visually accessible surfaces, but substrate and surrounding conditions as well.

# Focused Inspections Designed to Minimize Costs

Our inspection reports pinpoint suggested repair areas to minimize disruption to access and minimize the cost of maintenance. In most cases, small repairs made to problem areas fend off major repairs or safety issues encountered by the public.

## Non-Destructive Inspection Techniques

### Visual Inspections

Safety concerns, concrete substrate integrity, header and surrounding area assessment, vehicle damage, joint size and opening assessment, life cycle analysis etc.

### Ground Penetrating Radar GPR Technology

Quantitative corrosion mapping to detect conduit or rebar on or near expansion joint

### Ultrasonic Technology

Used for void detection in cracks, concrete assessment and imaging

# Clear, concise, technically valid and professional feedback

No matter what brand of expansion joint was originally installed, the **Inspection Experts at Watson Bowman Acme** will provide you with an accurate and unbiased report.

## Contact us today to schedule your inspection!
