Wabo[®]SurfaceMend

Gray Polymer Header System

Industry leading compressive strength
for the most demanding applications

What is Wabo®SurfaceMend?

Wabo®SurfaceMend is a two (2) part, specially formulated polymer concrete system designed for use in exterior applications on bridges, airports, and parking structures. When mixed with our proprietary aggregate, the impact resistance and flexibility of this product's high tensile elongation is combined with industry leading compressive strength to provide impressive durability for the most demanding applications.

What are the primary uses for Wabo®SurfaceMend?

- Expansion joint header for new and restoration applications
- Spall repair of existing headers and adjacent concrete decks
- Patching airport concrete runways and tarmac areas
- Voids in concrete decks in commercial construction

What features and benefits can I expect from Wabo®SurfaceMend?

FEATURES	BENEFITS
Fast Total Installation Time	<ul style="list-style-type: none"> • Minimal work is required to the blockout prior to placing material • A primer is not required • Multiple units can be mixed in larger batches for higher working volumes
Moisture Insensitivity	Installation can occur in damp conditions without affecting product performance
Superior Bond Strength	Specially formulated polymer forms a tenacious bond to concrete and other adjacent construction materials
High Strength	Industry leading compressive strength (3,200 psi, min) for the most demanding applications
Gray Color	Finished appearance blends into adjacent construction, and is approved for use in Airport facilities
