

# Wabo®ElastoPatch

Crack and Spall Repair Material

Features	Benefits
<ul style="list-style-type: none"> <li>• Unique repair solution</li> </ul>	Permanent repair to cracks and spalls.
<ul style="list-style-type: none"> <li>• Rapid installation</li> </ul>	Ambient cured material that is mixed in 5 minutes and typically open to traffic in one hour
<ul style="list-style-type: none"> <li>• Durability</li> </ul>	High load bearing and bonding capabilities accommodate heavy and repetitive impact loading

## DESCRIPTION:

The Wabo®ElastoPatch is a unique modified elastomeric concrete material for the repair of random cracks and spalls in existing portland cement concrete pavement.

Wabo®ElastoPatch is resistant to wear under repetitive loadings and chemical attack in harsh environments. The superior bonding capabilities to concrete minimizes edge spalling associated with high impact loads. Wabo®ElastoPatch is an ambient cured, flexible material forming a monolithic unit.

## RECOMMENDED FOR:

- Airport runways, taxiways, and aprons.
- Airfield pavement lighting
- Sealing of cracks on highways, bridges, and parking decks.
- High impact and repetitive loading spall conditions

## PACKAGING/COVERAGE:

- Wabo®ElastoPatch is available in Black only
- Wabo®ElastoPatch
  - PTA – ½ gal container
  - PTB – 1 gal container
  - PTC – 40 lbs aggregate
  - Wabo®Cast Silica Sand – 50 lb Bag
- Wabo®Bonding Agent
  - PTA – 1 qt container
  - PTB – 1 qt container
- Coverage
  - PTA+PTB+PTC = 1 unit
  - One unit = 0.5 cubic feet or 3.75 gal
  - One Bag Wabo®Cast = 10 units

**PHYSICAL PROPERTIES:**

PHYSICAL PROPERTY	ASTM TEST METHOD	REQUIREMENTS
<b>Binder Only</b>		
Tensile Strength	D 412	1000 psi min.
Elongation at Break	D 412	31% min.
Hardness (Shore D)	D 2240	50
<b>Binder and Aggregate</b>		
Bond Strength	C 190	250 psi min.
Compressive Yield Stress @5% deflection	D 695	1100 psi 500 psi
Impact Resistance	See Note <sup>1</sup>	No Cracks
8 ft		No Cracks
10 ft		No Cracks
>10ft		No Cracks
<small>1 - Specimens are cast discs with a 2.5" diameter and 0.375" thickness. Specimens are conditioned for four hours at test temperatures. A one pound steel ball is dropped onto the center of the specimen through a plastic tube from an initial height of 5 feet. The drop height is increased by intervals up to 7 feet or until the specimen cracks.</small>

## APPLICATION:

### INSTALLATION SUMMARY:

- Saw cut area around spall or crack
- Wabo®Bonding Agent must be used as a primer on the properly prepared concrete before beginning the installation of the Wabo®ElastoPatch
- Brush apply the bonding agent to the concrete surface and immediately begin the installation of the Wabo®ElastoPatch. DO NOT allow the bonding agent to cure.
- Thoroughly stir Wabo®ElastoPatch Part B component separately before pouring entire contents of Part B into a clean 5 gallon container. Add Part A and mix both components with a power mixer equipped with egg beater type paddle for 30 seconds and until well blended.
- Add the aggregate/fiber component to the liquid material and mix until all aggregate is coated (approximately 1 minute)
- After blending, Wabo®ElastoPatch is poured into the spall/crack area to desired thickness and profile.
- Upon completion of pour, broadcast Wabo®Cast Silica Sand on top surface for skid resistance
- Clean all excess material from the edges of the repair area. DO NOT allow the material to cure before removing it.

### LIMITED WARRANTY:

Watson Bowman Acme Corp. warrants that this product conforms to its current applicable specifications. WATSON BOWMAN ACME CORP. MAKES NO OTHER WARRANTY, EXPRESS OR IMPLIED, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE. The sole and exclusive remedy of Purchaser for any claim concerning this product, including, but not limited to, claims alleging breach of warranty, negligence, strict liability or otherwise, is the replacement of product or refund of the purchase price, at the sole option of Watson Bowman Acme Corp. Any claims concerning this product shall be submitted in writing within one year of the delivery date of this product to Purchaser and any claims not presented within that period are waived by Purchaser. IN NO EVENT SHALL WATSON BOWMAN ACME CORP. BE LIABLE FOR ANY SPECIAL, INCIDENTAL, CONSEQUENTIAL (INCLUDES LOSS OF PROFITS) OR PUNITIVE DAMAGES. Other warranties may be available when the product is installed by a factory trained installer. Contact your local Watson Bowman Acme representative for details. ## FOR BEST RESULTS:

- Install when concrete substrate is clean, sound, dry, and cured (14 day minimum).
- Do not install if surface temperature is less than 40°F (4°C).
- Do not allow any of the components to freeze prior to installation. Store all components out of direct sunlight in a clean, dry location between 50°F (10°C) and 90°F (32°C).
- Shelf life of chemical components is 1 year.
- Periodically inspect the applied material and repair localized areas as needed. Consult a Watson Bowman Acme representative for additional information.
- Make certain the most current version of the product data sheet is being used. Please consult the website ([www.wbacorp.com](http://www.wbacorp.com)) or contact a customer service representative.
- Proper application is the responsibility of the user. Field visits by Watson Bowman Acme personnel are for the purpose of making technical recommendations only and not for supervising or providing quality control on the jobsite.

## OPTIONS/EQUIPMENT:

- ¾" slow speed, high torque paddle mixer with egg beater (mud beater) style mixing blade.
